Aditya Raj

Dehradun, Uttarakhand arajsinha4@gmail.com Aditgm aditya-raj

Computer Science Undergraduate — AI/ML Specialist — Full-Stack Developer — Competitive Programmer

Experience

Open Source Contributor — *June 2025 – September 2025*
GirlScript Summer of Code (GSSOC)

- Contributed to open-source AI projects, gaining experience with collaborative development practices
- Developed web application features using Node.js and Python to improve user experience

Machine Learning Research Mentee — *August 2025 – September 2025*
Amazon ML Summer School

- Selected as one of approximately 3,000 participants globally (acceptance rate < 5%).
- Learning machine learning fundamentals, neural networks, and practical applications through structured curriculum.

Competitive Programming

- **Codeforces**: Master (**2131** rating)-**Top 0.8% globally**
- **LeetCode**: Guardian on LeetCode (**2360+** rating)(**Top 0.4% on LeetCode globally**)
- **CodeChef**: **5-star** (**2101 rating**)-Ranked 470th in India.
- Solved **2000+ problems** across platforms (VJudge, CSES, HackerRank)
- Ranked **169 out of 30000+** in LeetCode WEEKLY Contest 462 globally.(**Top 0.005 % globally**)
- Ranked **45 out of 20000+** participant in (Codeforces Round 1068, Div. 2). (**Top 0.003 % globally**).

Projects

Dengue-spot - Community Dengue Prevention App

- Designed and deployed a MERN-based disease surveillance platform, integrating Socket.io for bi-directional, real-time community chat and OAuth 2.0 for secure user authentication.
- Engineered an automated image-processing pipeline using Roboflow's Computer Vision API to detect mosquito breeding grounds from user uploads, enabling rapid geographical risk assessment.
- Fortified backend infrastructure by implementing strict Role-Based Access Control (RBAC), API rate-limiting, and middleware IP banning to mitigate abusive traffic and secure health data.

Tech Stack: *MongoDB, Express.js, React.js, Node.js, Python, Socket.io, Roboflow*

Legal Lens – AI-Powered Legal Help Community Platform

- Architected a Retrieval-Augmented Generation (RAG) pipeline utilizing Llama 3.3 (70B) to generate context-aware legal insights, accelerating complex statutory research workflows by 85%.
- Built a high-performance semantic search engine using Pinecone Vector DB to index 1,000+ legal documents, delivering sub-150ms query latencies while maintaining 92% retrieval accuracy.

Tech Stack: *Next.js, Llama 3.3, Pinecone, MongoDB*

YouTubey - AI Video Summarizer for Students

- Built an automated data-extraction pipeline leveraging the Google Gemini API to process YouTube transcripts and generate structured, context-rich educational summaries.
- Optimized a Node.js backend deployed on Render, implementing efficient asynchronous request handling to reduce processing latency by 30% and reliably support 100+ concurrent connections.

Tech Stack: *React.js, Node.js, Google Gemini API, Render*

Technical Skills

Languages: C/C++, Python, JavaScript/TypeScript, SQL
Web Development: React.js, Next.js, Node.js, Express.js, HTML/CSS, Streamlit
Databases & AI/ML: MongoDB, Pinecone (Vector DB), Llama 3.3, Google Gemini API, RAG, Roboflow
Tools & Platforms: Docker, Git/GitHub, Render, Socket.io, Pandas, Plotly

Education

DIT University — *April 2023 – Present*
B.Tech in Computer Science & Engineering (AI/ML Specialization)

- **GPA:** 8.41/10.0
